EDUCATION

LONDON SCHOOL OF ECONOMICS

MSc Financial Mathematics (Incoming)

London, EN

2026 - 2027

- Coursework includes stochastic calculus, derivatives pricing, quantitative risk modelling, and portfolio management.

UNIVERSITY COLLEGE LONDON

BSc Mathematics with Economics : First Class Honours

London, EN

2023 - 2026

- Relevant Coursework: Linear Algebra, Machine Learning, Data Structures & Algorithms, Statistics, Financial Mathematics.

WORK EXPERIENCE

L'OREAL UK&I

Revenue Growth Management Summer Intern

London, EN

June 2025 – September 2025

- Analyzed large-scale NIQ pricing datasets to quantify SKU-level price dispersion, promotional elasticity, and inflation sensitivity across FMCG categories.
- Built automated end-to-end Python data pipelines for pricing analysis, enabling consistent, repeatable tracking of SKU-level price indices with minimal manual intervention.
- Redesigned the internal CPI Tracker to incorporate finer SKU-level granularity, improving the precision of price-movement measurement and downstream pricing decisions.

INDIAN INSTITUTE OF TECHNOLOGY

Research Intern (with Prof. Dootika Vas)

Kanpur, UP

August 2024 - September 2024

- Developed MCMC simulation models in R and Python to assess fairness and bias in electoral redistricting, applying probabilistic and statistical principles to spatial data.
- Implemented the Metropolis–Hastings algorithm to generate and evaluate random districting plans, modelling redistricting as a graph-partitioning problem under population-balance constraints.
- Analysed convergence behaviour and visualised seat-share distributions across thousands of iterations, interpreting outcomes to identify structural bias and algorithmic stability.

GLOBAL EQUITY MANAGEMENT

2025 Fall Analyst

London, EN

October 2025 – December 2025

- Built a fully linked three-statement financial model and DCF valuation from primary filings, incorporating unit-level revenue drivers, working capital dynamics, and scenario analysis.
- Performed industry and company analysis using competitive-advantage frameworks, KPI trend analysis, and comparable-company valuation translating qualitative drivers into explicit modelling assumptions.
- Presented a full stock pitch with quantitative backing, responding to Q&A on model structure, assumptions, and risk factors.

LEADERSHIP

ECONOMICS AND FINANCE SOCIETY - UCL

Welfare Officer

London, EN

October 2023 - May 2025

- Held second-highest leadership role in UCL's largest financial society, driving strategic initiatives and organizational growth.
- Oversaw EFS's all 10 divisions, to organize finance talks, panel events, consulting workshops, etc.
- Organized speaker events with industry professionals from McKinsey, Evercore, and JP Morgan.

PROJECTS

LIMIT ORDER BOOK ANALYTICS ENGINE

Python - 2026

- Reconstructed historical limit order books from Level-2 exchange data using price-time priority.
- Computed market microstructure metrics including bid-ask spread, microprice, order book imbalance, and liquidity profiles.
- Built interactive Plotly replay tools to analyze order flow, liquidity dynamics, and execution quality across trading sessions.

ADDITIONAL INFORMATION

- GMAT Focus Edition – 685
- Silver Honour – International Youth Math Challenge; Bronze Award – Philippine International Math Olympiad
- Proficient in Python, R, Power BI, Excel, PowerPoint, LaTeX
